Git & Maven
Interview Question Bank

Deduplicated, ranked by importance and grouped by topic
Prepared for a Test Automation Engineer with 4+ years of experience

Questions in your original document	**68**
Exact duplicates removed (same question, different wording of punctuation or case)	**0**
Near-duplicates merged (same question asked in different words)	**27**
Unique questions in this PDF	**41**

Section 1: Critical (Must Prepare)	16 questions
Section 2: High Priority	18 questions
Section 3: Medium Priority	7 questions

How to Use This Document

Questions are ordered by how likely they are to be asked and how much weight interviewers give them for a tester with 4+ years of experience. Work top to bottom: finish Section 1 before you spend time on Section 3 or 4. Inside each section the questions are grouped by topic, and within each topic the most important question comes first.

A red tag such as **[asked x3 in your bank]** means the same question showed up several times in your original document (in different wording). Repetition is a good signal that it is a frequently asked question.

Section	What it means
Critical (Must Prepare) 16 questions	Asked in almost every automation interview at 4+ years. Answer with how you use Git and Maven in YOUR framework and team.
High Priority 18 questions	Frequent practical questions. Answer with the command or pom.xml snippet you would use.
Medium Priority 7 questions	Occasionally asked, usually as follow-ups to a Git or Maven answer.

What Interviewers Look For (4+ Years)

Topic	What the interviewer is testing
Git: Merge, Rebase, Conflicts, PRs	Collaboration skills: when you rebase vs merge, how you resolve conflicts, and how PRs work in your team.
Git: Fundamentals & Workflow	Branching model, version-controlling the framework, Git vs GitHub, local vs remote.
Git: Everyday Commands	Fluent use of clone, add, commit, push, stash, revert and history commands.
Maven in Automation Projects	How Maven runs TestNG through Surefire, profiles per environment, and runs in Jenkins.
Maven: pom.xml & Dependencies	Structure of pom.xml, dependency scope, repositories, parent POM.
Maven: Lifecycle & Plugins	Lifecycle phases, clean/install/deploy, and what plugins do.

Note: short fragments in your file (for example 'git stash usage' or 'Profiles in Maven') are phrased as full questions and merged with matching ones. The Git and Maven parts of your file are ranked together but kept in separate topics.

Table of Contents

Section 1: Critical (Must Prepare) (16 questions) 5
Git: Merge, Rebase, Conflicts & Pull Requests (4) 5
Git: Fundamentals, Branching & Workflow (4) 5
Git: Everyday Commands, Undo & History (1) 5
Maven in Automation Projects (TestNG, Profiles, Jenkins) (2) 5
Maven: Fundamentals, pom.xml & Dependencies (3) 5
Maven: Lifecycle, Commands & Plugins (2) 5

Section 2: High Priority (18 questions) 6
Git: Merge, Rebase, Conflicts & Pull Requests (2) 6
Git: Fundamentals, Branching & Workflow (4) 6
Git: Everyday Commands, Undo & History (4) 6
Maven in Automation Projects (TestNG, Profiles, Jenkins) (2) 6
Maven: Fundamentals, pom.xml & Dependencies (2) 6
Maven: Lifecycle, Commands & Plugins (4) 6

Section 3: Medium Priority (7 questions) 7
Git: Fundamentals, Branching & Workflow (3) 7
Git: Everyday Commands, Undo & History (3) 7
Maven in Automation Projects (TestNG, Profiles, Jenkins) (1) 7

Topic Finder (all sections for one topic)

Use this if you want to study one topic at a time. Each number links to that topic's questions inside a section.

Topic	S1	S2	S3	Total
Git: Merge, Rebase, Conflicts & Pull Requests	4 Qs, p.5	2 Qs, p.6	-	**6**
Git: Fundamentals, Branching & Workflow	4 Qs, p.5	4 Qs, p.6	3 Qs, p.7	**11**
Git: Everyday Commands, Undo & History	1 Qs, p.5	4 Qs, p.6	3 Qs, p.7	**8**
Maven in Automation Projects (TestNG, Profiles, Jenkins)	2 Qs, p.5	2 Qs, p.6	1 Qs, p.7	**5**
Maven: Fundamentals, pom.xml & Dependencies	3 Qs, p.5	2 Qs, p.6	-	**5**
Maven: Lifecycle, Commands & Plugins	2 Qs, p.5	4 Qs, p.6	-	**6**

S1 = Critical, S2 = High, S3 = Medium, S4 = Low priority.

Section 1: Critical (Must Prepare) (16 questions)

Asked in almost every automation interview at 4+ years. Answer with how you use Git and Maven in YOUR framework and team.

Git: Merge, Rebase, Conflicts & Pull Requests (4)

1. What is the difference between git merge and git rebase? When do you use each? **[asked x2 in your bank]**
2. How do you resolve merge conflicts in Git? **[asked x2 in your bank]**
3. What is a pull request (PR) and why does QA use it? How do you create one? **[asked x2 in your bank]**
4. What is the difference between git fetch and git pull? **[asked x2 in your bank]**

Git: Fundamentals, Branching & Workflow (4)

5. What is Git and why is it important for QA engineers? What is the purpose of a version control tool? **[asked x3 in your bank]**
6. Explain the Git branching model for QA.
7. How do you version control your automation framework?
8. Which Git commands have you used? **[asked x2 in your bank]**

Git: Everyday Commands, Undo & History (1)

9. How do you revert a commit without losing history? **[asked x2 in your bank]**

Maven in Automation Projects (TestNG, Profiles, Jenkins) (2)

10. How is Maven used in a Selenium or test automation framework?
11. How do you run TestNG tests from Maven (testng.xml with the Surefire plugin)?

Maven: Fundamentals, pom.xml & Dependencies (3)

12. What is Maven and why is it used in automation frameworks? **[asked x2 in your bank]**
13. What is pom.xml and what is its structure? **[asked x2 in your bank]**
14. How does Maven manage dependencies? What are dependency scopes and how do you add a dependency from Maven Central? **[asked x3 in your bank]**

Maven: Lifecycle, Commands & Plugins (2)

15. What is the Maven lifecycle and what are its phases? **[asked x3 in your bank]**
16. What are the common Maven commands (clean, install, test)?

Section 2: High Priority (18 questions)

Frequent practical questions. Answer with the command or pom.xml snippet you would use.

Git: Merge, Rebase, Conflicts & Pull Requests (2)

17. How do you merge branches?
18. How do you stash changes in Git and when do you use git stash? **[asked x2 in your bank]**

Git: Fundamentals, Branching & Workflow (4)

19. What is the difference between Git and GitHub?
20. What is the difference between a local and a remote repository?
21. What is .gitignore and why does QA use it? **[asked x2 in your bank]**
22. How do you trigger builds using Git?

Git: Everyday Commands, Undo & History (4)

23. What are the basic Git commands (init, clone, status, add, commit, push, pull)? How do you clone a repository from GitHub? **[asked x4 in your bank]**
24. How do you create and switch to a new branch, and check which branch you are on? **[asked x3 in your bank]**
25. How do you undo the last commit but keep the changes?
26. How do you view commit history?

Maven in Automation Projects (TestNG, Profiles, Jenkins) (2)

27. What are profiles in Maven and how do you use them for different environments?
28. How do you use Maven with Jenkins?

Maven: Fundamentals, pom.xml & Dependencies (2)

29. What are Maven repositories and their types (local, central, remote)? **[asked x2 in your bank]**
30. What is a parent POM and how does inheritance work in Maven? **[asked x2 in your bank]**

Maven: Lifecycle, Commands & Plugins (4)

31. How do you run tests using Maven?
32. What is the difference between build and clean, and between install and deploy? **[asked x2 in your bank]**
33. What is the purpose of Maven plugins? What is the Surefire plugin? **[asked x2 in your bank]**
34. How do you exclude tests in a Maven build?

Section 3: Medium Priority (7 questions)

Occasionally asked, usually as follow-ups to a Git or Maven answer.

Git: Fundamentals, Branching & Workflow (3)

35. What are Git tags and how does QA use them?
36. What is the difference between GitHub and GitLab?
37. How do you fork a repository and set an upstream remote? **[asked x2 in your bank]**

Git: Everyday Commands, Undo & History (3)

38. How do you delete or rename a branch? **[asked x2 in your bank]**
39. How do you see the differences between two commits?
40. How do you see who made changes to a file?

Maven in Automation Projects (TestNG, Profiles, Jenkins) (1)

41. How do you integrate Cucumber in a Maven project?
