Selenium Automation Interview Question Bank

Deduplicated, ranked by importance and grouped by topic
Prepared for a Test Automation Engineer with 4+ years of experience

Questions in your original document	**955**
Exact duplicates removed (same question, different punctuation, case or formatting)	**91**
Near-duplicates merged (same question asked in different words)	**659**
Unique questions in this PDF	**205**

Section 1: Critical (Must Prepare)	65 questions
Section 2: High Priority	81 questions
Section 3: Medium Priority	48 questions
Section 4: Low Priority / Quick Revision	11 questions

How to Use This Document

Questions are ordered by how likely they are to be asked and how much weight interviewers give them for a tester with 4+ years of experience. Work top to bottom: finish Section 1 before you spend time on Section 3 or 4. Inside each section the questions are grouped by topic, and within each topic the most important question comes first.

A red tag such as **[asked x3 in your bank]** means the same question showed up several times in your original document (in different wording). Repetition is a good signal that it is a frequently asked question.

Section	What it means
Critical (Must Prepare) 65 questions	Asked in almost every Selenium interview at 4+ years. Prepare a precise answer plus a real example from your own framework. Expect follow-ups such as 'what happened in your project?'.
High Priority 81 questions	Frequent practical and scenario questions. They check hands-on depth, so answer with the approach, the code idea and the problem it solves.
Medium Priority 48 questions	Occasionally asked, often as follow-ups or to probe a specific area from your resume. One clear answer each.
Low Priority / Quick Revision 11 questions	Niche or rarely asked at 4+ years. Skim them so you are never caught off guard.

What Interviewers Look For (4+ Years)

Topic	What the interviewer is testing
Selenium & WebDriver	Do you understand how WebDriver works (interface, architecture, drivers) rather than just using the API?
Locators, XPath & CSS	Choosing stable locators, writing XPath on the spot (axes, contains), and handling dynamic attributes.
Waits & Synchronization	Implicit vs explicit vs fluent, why mixing is risky, and how you actually remove Thread.sleep.
Element Interactions	Real project hands-on: dropdowns, Actions class, JavaScriptExecutor, scrolling, tables, screenshots.
Windows, Frames, Alerts	Switching contexts correctly and handling unexpected pop-ups.
Exceptions & Troubleshooting	How you diagnose Stale, NoSuchElement, ClickIntercepted errors, not just their names.
Flaky Tests & Debugging	Root-cause thinking: CI vs local, timing, data and environment issues, retry strategy.
POM & Page Factory	Clean design: why POM, how you structure pages, POM vs Page Factory, initialization.
Framework Design	Architecture ownership: layers, utilities, patterns, scalability. The most important section at 4+ years.
TestNG	Annotations and execution order, DataProvider, listeners, parallel runs and testng.xml configuration.
Cucumber & BDD	Feature files, step definitions, hooks, tags, runner, Scenario Outline and how it integrates with TestNG.
Data, Config, Reporting	Data-driven design, environment config, reports with screenshots, logging.
Cross-browser, Grid, CI/CD	Executing at scale: parallel runs, Grid/Docker, Jenkins pipelines, Maven and Git.
Scenario-Based	Judgement in real situations: what to automate, CAPTCHA/OTP, regression triage.
Java in Framework	Whether you can explain OOP and collections through your own framework code.
Strategy & Metrics	Senior-level thinking: ROI, estimates, metrics, maintenance and risks of over-automation.

Note: many entries were topic fragments (for example 'Scroll Until Element Visible' or 'Retry Failed Test Cases (TestNG)'); they are phrased as full questions and merged with matching questions. Questions on Java, Cucumber and TestNG that appear in several places are combined into one.

Automation Strategy, Metrics & Career	-	3 Qs, p.12	5 Qs, p.14	4 Qs, p.16	**12**

S1 = Critical, S2 = High, S3 = Medium, S4 = Low priority.

Section 1: Critical (Must Prepare) (65 questions)

Asked in almost every Selenium interview at 4+ years. Prepare a precise answer plus a real example from your own framework. Expect follow-ups such as 'what happened in your project?'.

Selenium & WebDriver Fundamentals (3)

1. What is Selenium WebDriver and how does it work? Explain its architecture. **[asked x5 in your bank]**
2. What is the WebDriver interface? What does WebDriver driver = new ChromeDriver() mean? Which interfaces does Selenium use and where is dynamic polymorphism seen? **[asked x6 in your bank]**
3. What is the difference between driver.close() and driver.quit()? **[asked x7 in your bank]**

Locators, XPath & CSS (5)

4. What are the different types of locators in Selenium? Which do you prefer and what is their reliability order? **[asked x7 in your bank]**
5. What is the difference between findElement() and findElements()? What do they return and what happens when nothing is found? **[asked x13 in your bank]**
6. XPath vs CSS Selector: when do you use each, and which is faster? **[asked x8 in your bank]**
7. What is XPath and what are its types? Difference between absolute and relative XPath. **[asked x7 in your bank]**
8. How do you handle dynamic web elements (changing IDs or attributes)? Write a locator strategy. **[asked x12 in your bank]**

Waits & Synchronization (3)

9. What are the different waits in Selenium? Explain implicit vs explicit vs fluent wait and when to use each. **[asked x17 in your bank]**
10. Can implicit and explicit waits be mixed? Which one takes effect and is it good practice? **[asked x2 in your bank]**
11. How do you handle AJAX, slow-loading pages or elements that appear late (dynamic waits, page load)? **[asked x9 in your bank]**

Element Interactions, Actions & JavaScriptExecutor (5)

12. How do you handle dropdowns (Select class: visible text, index, value; get all options; deselect)? **[asked x13 in your bank]**
13. What is the Actions class and when do you use it? Actions vs direct WebElement methods. **[asked x6 in your bank]**
14. What is JavaScriptExecutor and why/how is it used? **[asked x6 in your bank]**
15. How do you scroll a page, scroll to an element that is not in view, or scroll until the footer is visible? **[asked x9 in your bank]**
16. How do you capture a screenshot on test failure (named by test) and attach it to the report? **[asked x10 in your bank]**

Windows, Frames, Alerts & Pop-ups (3)

17. How do you handle alerts, pop-ups and browser dialogs (accept, dismiss, getText, sendKeys)? **[asked x18 in your bank]**

18. How do you handle multiple windows or tabs and switch between them (parent window, title check)? **[asked x12 in your bank]**
19. How do you handle frames and iframes (switch in, switch back, nested frames)? **[asked x11 in your bank]**

Exceptions & Troubleshooting (5)

20. What is StaleElementReferenceException? What causes it and how do you handle or avoid it (after refresh or AJAX)? **[asked x12 in your bank]**
21. What are the common exceptions you faced in Selenium and Java, and which was hardest to solve? **[asked x4 in your bank]**
22. How do you avoid NoSuchElementException (with and without try/catch)? Intermittent NoSuchElement issues? **[asked x3 in your bank]**
23. The locator is correct and the element is on the page, but you still get "element not found". How do you resolve it? **[asked x2 in your bank]**
24. What causes ElementNotInteractable / ElementClickIntercepted exceptions, and what do you do when click() does not work? **[asked x4 in your bank]**

Flaky Tests, Retry & Debugging (6)

25. How do you handle and avoid flaky tests? What are the common causes and how do you investigate them (CI, Jenkins, BrowserStack)? **[asked x13 in your bank]**
26. How do you implement retry logic for failed tests (IRetryAnalyzer, retry a step in the same test)? **[asked x8 in your bank]**
27. If a test fails, what is your next step? A script that worked yesterday fails today. How do you debug? **[asked x6 in your bank]**
28. Tests pass locally but fail on Jenkins/CI nodes. How do you debug? **[asked x2 in your bank]**
29. The application has minor changes (small CSS/HTML changes break many tests). How do you maintain and update scripts? **[asked x6 in your bank]**
30. Your automation scripts are slow, or the regression suite takes about 5 hours while stakeholders need results in under 1 hour. How do you speed it up? **[asked x3 in your bank]**

File Upload/Download & Broken Links (3)

31. How do you handle file upload in Selenium (sendKeys, Robot class, AutoIt)? Upload and download together? **[asked x8 in your bank]**
32. How do you handle file download and verify it (file exists, content is correct)? **[asked x8 in your bank]**
33. How do you find broken links and broken images on a page? **[asked x11 in your bank]**

Page Object Model & Page Factory (3)

34. What is the Page Object Model (POM)? What are its advantages and how do you implement it (e.g. a LoginPage class)? **[asked x20 in your bank]**
35. What is the difference between Page Object Model and Page Factory? **[asked x3 in your bank]**
36. What is Page Factory? @FindBy vs driver.findElement, initElements and the annotations used in POM. **[asked x9 in your bank]**

Framework Design & Architecture (4)

37. Explain your automation framework (architecture, folder structure and flow). **[asked x9 in your bank]**

38. How would you design a scalable, maintainable framework (Java + TestNG/Cucumber, UI and API, Docker, CI/CD) or build one from scratch? Best practices? **[asked x9 in your bank]**
39. What is an automation framework, why do you need one, and what types exist (data-driven, keyword, hybrid, BDD)? **[asked x12 in your bank]**
40. What was the most challenging thing in designing your framework, and what automation challenges did you overcome? **[asked x3 in your bank]**

TestNG (8)

41. What is TestNG and why use it? How does it differ from JUnit? **[asked x12 in your bank]**
42. Explain TestNG annotations and their execution order (BeforeSuite, BeforeTest, BeforeClass, BeforeMethod). BeforeTest vs BeforeMethod. **[asked x15 in your bank]**
43. How do priorities work in TestNG? How do you control execution order? **[asked x7 in your bank]**
44. What is DataProvider and how do you use it for parameterization (and parameters through XML)? Attributes of @DataProvider. **[asked x13 in your bank]**
45. What is testng.xml used for? How do you configure and run tests, add or remove tests, and run multiple suites? **[asked x11 in your bank]**
46. How do you run tests in parallel in TestNG (parallel attribute, testng.xml or Maven) and make the framework thread-safe? **[asked x17 in your bank]**
47. How do you execute only the failed test cases (e.g. 50 tests, 5 failed) in TestNG? **[asked x4 in your bank]**
48. Hard vs soft assertions and Assert vs Verify: when do you use which? **[asked x10 in your bank]**

Cucumber & BDD (7)

49. What is BDD and Cucumber? Why is it used with Selenium? Explain Gherkin syntax and keywords. Have you used it? **[asked x14 in your bank]**
50. How are step definitions created and mapped to feature file steps? What if multiple definitions match the same step? **[asked x6 in your bank]**
51. What are hooks in Cucumber (@Before, @After)? Hooks vs tags. **[asked x9 in your bank]**
52. What are tags in Cucumber? How do you run specific scenarios or combinations of tags? **[asked x8 in your bank]**
53. What is the difference between Scenario and Scenario Outline? Explain Examples. **[asked x5 in your bank]**
54. What is the Cucumber runner class and how is it configured (glue, features, plugins)? Write the skeleton. **[asked x8 in your bank]**
55. How do you integrate Cucumber with Selenium WebDriver and TestNG? **[asked x4 in your bank]**

Test Data, Configuration, Reporting & Logging (4)

56. How do you implement data-driven testing and manage test data in your framework (Excel, CSV, JSON)? **[asked x13 in your bank]**
57. How do you read data from an Excel file in Java? Write the code. **[asked x4 in your bank]**
58. How do you manage environment configuration (URLs, credentials, toggles for DEV/QA/UAT/PROD) and config.properties? **[asked x10 in your bank]**
59. How do you generate reports (Extent/Allure) with screenshots, steps and logs? Where are reports stored or published? **[asked x14 in your bank]**

Cross-browser, Grid, Docker, CI/CD, Maven & Git (2)

60. How do you implement cross-browser testing and run across browsers, versions and environments? **[asked x8 in your bank]**
61. Explain CI/CD and how you integrate automation with Jenkins or Azure DevOps. **[asked x5 in your bank]**

Scenario-Based & Real-World Automation (2)

62. How would you automate login (including multiple user roles and permissions) and handle authentication? **[asked x5 in your bank]**
63. How do you decide what to automate and what not to automate? (e.g. a long-running scenario: manual or automation?) **[asked x4 in your bank]**

Java Concepts in the Selenium Framework (2)

64. Explain OOP concepts and where you applied them in your framework (inheritance, polymorphism, abstraction, encapsulation). **[asked x6 in your bank]**
65. Overloading vs overriding in a Selenium framework, with examples. **[asked x3 in your bank]**

Section 2: High Priority (81 questions)

Frequent practical and scenario questions. They check hands-on depth, so answer with the approach, the code idea and the problem it solves.

Selenium & WebDriver Fundamentals (7)

66. What is Selenium and what are its core components (IDE, RC, WebDriver, Grid)? **[asked x4 in your bank]**
67. What are the limitations of Selenium? **[asked x3 in your bank]**
68. Selenium vs Playwright: which is better and when? Can the same locators be reused? **[asked x2 in your bank]**
69. What is the difference between driver.get(), driver.navigate().to() and driver.switchTo()? What are the navigation commands? **[asked x5 in your bank]**
70. What do getText(), getAttribute(), getDomAttribute() and getDomProperty() do, and how do they differ? **[asked x4 in your bank]**
71. How do you check whether an element is displayed, enabled or selected? How do you check a disabled button without isEnabled()? **[asked x6 in your bank]**
72. What ChromeOptions have you used and why?

Locators, XPath & CSS (5)

73. Explain XPath functions and axes: contains(), starts-with(), normalize-space(), following-sibling, preceding and the :: operator. **[asked x4 in your bank]**
74. What is the difference between "/" and "//" in XPath? Write XPath for an element with specific text or from given HTML. **[asked x4 in your bank]**
75. How do you select the nth (e.g. third) element among multiple similar elements using XPath and CSS? **[asked x4 in your bank]**
76. How do you handle shadow DOM elements (and iframe switching)? **[asked x4 in your bank]**
77. What is a WebElement and how do you locate WebElements?

Waits & Synchronization (5)

78. What is synchronization in Selenium? **[asked x3 in your bank]**
79. Pros and cons of implicit and explicit waits. Why prefer explicit over fluent? What is the implicit wait best practice? **[asked x4 in your bank]**
80. What is the default polling time of explicit/fluent wait? **[asked x2 in your bank]**
81. What are Expected Conditions? Give 5 examples. How do urlToBe() and titleIs() differ? **[asked x3 in your bank]**
82. Write code for implicit, explicit and fluent waits, and a custom FluentWait instead of Thread.sleep. Thread.sleep vs implicit wait? **[asked x7 in your bank]**

Element Interactions, Actions & JavaScriptExecutor (11)

83. How do you handle dynamic dropdowns (values change by previous selection, 500 values, last option, Streams)? **[asked x4 in your bank]**
84. How do you handle auto-suggest / auto-fill fields and validate the listed options? **[asked x2 in your bank]**
85. How do you perform mouse hover, double-click and right-click? **[asked x6 in your bank]**

86. How do you automate drag and drop? **[asked x3 in your bank]**
87. How do you handle keyboard events (ENTER key, keyboard shortcuts)? **[asked x3 in your bank]**
88. Why do we use build() and perform() with Actions? Can perform() be used without build()? **[asked x3 in your bank]**
89. How do you handle hidden or invisible elements? **[asked x5 in your bank]**
90. How do you handle web tables (dynamic data, extract data, verify sorting)? **[asked x4 in your bank]**
91. How do you handle date pickers / calendars? **[asked x2 in your bank]**
92. How do you handle SSL certificate errors? **[asked x6 in your bank]**
93. How do you take a screenshot? Is TakesScreenshot an interface or a class? **[asked x6 in your bank]**

Windows, Frames, Alerts & Pop-ups (4)

94. What are the return types of getWindowHandle() and getWindowHandles()? **[asked x3 in your bank]**
95. Pop-ups appear at unpredictable times. How do you handle them with WebDriver? **[asked x2 in your bank]**
96. How do you validate data inside a modal or pop-up?
97. How do you handle Windows-based pop-ups and Windows applications (AutoIt, Robot)? **[asked x4 in your bank]**

Exceptions & Troubleshooting (1)

98. What is your strategy when Selenium cannot automate a specific step?

Flaky Tests, Retry & Debugging (2)

99. A regression release is due tonight and overnight CI shows failures in modules that were not touched. How do you triage?
100. How do you deal with unstable or inconsistent test environments?

File Upload/Download & Broken Links (1)

101. How do you handle file upload when the element is not type=file, or in remote execution (Grid/cloud)? **[asked x2 in your bank]**

Page Object Model & Page Factory (2)

102. How do you initialize web elements in POM? What exception occurs if you do not? What do you write first in a page class? **[asked x3 in your bank]**
103. You have 10 pages. How do you achieve POM, call page methods from tests and use it with TestNG or Cucumber? **[asked x4 in your bank]**

Framework Design & Architecture (6)

104. What is a hybrid framework and how do you create one? **[asked x2 in your bank]**
105. Which do you prefer: a Cucumber or a TestNG hybrid framework? Why?
106. What are the essential components of an automation framework?
107. Which design patterns have you used (Singleton, Factory, POM)? Where do you use Singleton? Factory vs Singleton? **[asked x4 in your bank]**
108. How do you build reusable components, utility classes and modular tests? **[asked x4 in your bank]**

109. How do you integrate API and database testing with UI automation? API vs UI frameworks? **[asked x3 in your bank]**

TestNG (7)

110. What are TestNG Listeners (ITestListener, IReporter)? What types exist and how do you implement a custom listener? **[asked x7 in your bank]**
111. How do you group test cases and run specific groups in TestNG? **[asked x6 in your bank]**
112. How do you create dependencies between tests (dependsOnMethods)? **[asked x4 in your bank]**
113. How do you skip a test in TestNG (enabled=false, SkipException)? **[asked x5 in your bank]**
114. What are the @Test attributes (invocationCount, timeOut, expectedExceptions, groups, alwaysRun)? **[asked x5 in your bank]**
115. How do you run the same test method many times (e.g. 100 times with the same data)? **[asked x2 in your bank]**
116. How do you generate TestNG reports? **[asked x5 in your bank]**

Cucumber & BDD (10)

117. What are Background in Cucumber and how do you implement it? **[asked x4 in your bank]**
118. What are Data Tables? How do you convert them to a list or map? DataTable vs Examples? How do you handle test data in scenarios? **[asked x7 in your bank]**
119. How do you pass parameters in step definitions (regex, placeholders)? **[asked x4 in your bank]**
120. How do you run Cucumber tests in parallel? **[asked x4 in your bank]**
121. How do you share data between steps (World/context object)? **[asked x3 in your bank]**
122. How do you generate Cucumber reports (HTML)? **[asked x3 in your bank]**
123. How do you structure a Cucumber project and feature files? **[asked x5 in your bank]**
124. How do you write reusable step definitions and follow best practices? **[asked x4 in your bank]**
125. What are the limitations of Cucumber?
126. What is the difference between BDD and TDD?

Test Data, Configuration, Reporting & Logging (4)

127. How do you read JSON using ObjectMapper?
128. How do you ensure test data independence, isolate data for parallel runs and clean up after tests? **[asked x6 in your bank]**
129. How do you manage sensitive data like passwords and test credentials? **[asked x2 in your bank]**
130. How do you implement logging in your framework (Log4j)? **[asked x3 in your bank]**

Cross-browser, Grid, Docker, CI/CD, Maven & Git (6)

131. What is Selenium Grid and RemoteWebDriver? How do you run tests on a Grid or remote machine? **[asked x6 in your bank]**
132. How do you run Selenium tests in Docker or without a local browser? **[asked x3 in your bank]**
133. What is headless browser testing? Advantages, disadvantages and how to run it. **[asked x8 in your bank]**
134. What is Maven and how is it used? Structure of pom.xml, group id vs artifact id, running TestNG with Maven. **[asked x5 in your bank]**

135. How do you use Git and version control in your automation project? **[asked x3 in your bank]**
136. How do you handle a failed automation build in Jenkins?

Scenario-Based & Real-World Automation (3)

137. How do you handle CAPTCHA in automation? **[asked x5 in your bank]**
138. How do you handle OTP in automation? **[asked x3 in your bank]**
139. You are asked to automate a functionality that is not fully developed. How do you handle it? **[asked x2 in your bank]**

Java Concepts in the Selenium Framework (4)

140. How do you use interfaces and abstract classes in Selenium? Why are interfaces important in automation? **[asked x3 in your bank]**
141. Which Java collections have you used in your framework? Do you use a property file, and which Java concept does it use? **[asked x4 in your bank]**
142. How do you handle exceptions in Java Selenium scripts? Checked vs unchecked exceptions. **[asked x3 in your bank]**
143. How are constructors, the this and super keywords, access modifiers and multiple classes used in the framework? **[asked x5 in your bank]**

Automation Strategy, Metrics & Career (3)

144. What metrics do you track in test automation? How do you track coverage and calculate ROI? **[asked x4 in your bank]**
145. How do you estimate effort for automation?
146. Describe a time you owned the framework during a critical release. What are your key achievements in automation? **[asked x2 in your bank]**

Section 3: Medium Priority (48 questions)

Occasionally asked, often as follow-ups or to probe a specific area from your resume. One clear answer each.

Selenium & WebDriver Fundamentals (9)

147. How do you open a URL, get the title, current URL and page source, navigate back/forward and refresh? **[asked x9 in your bank]**
148. How do you maximize, minimize and resize the browser window? What does driver.manage() return? **[asked x4 in your bank]**
149. What is the difference between Selenium RC and WebDriver? **[asked x2 in your bank]**
150. What are the advantages of Selenium over other tools, and why do we still use it despite third-party jars? **[asked x2 in your bank]**
151. Why is Java preferred for Selenium automation?
152. What is WebDriverManager? **[asked x2 in your bank]**
153. What are DesiredCapabilities? **[asked x2 in your bank]**
154. How do you verify the color, font and position of an element? **[asked x3 in your bank]**
155. What is the difference between submit() and click()?

Locators, XPath & CSS (2)

156. If proper XPath, CSS and ID are not available, how do you identify an element? What are the CSS selector attributes? **[asked x2 in your bank]**
157. With only CSS locators, how do you find the parent or grandparent of an element?

Waits & Synchronization (2)

158. Does a script work without an implicit wait?
159. How do you define page load strategies? What is Page Load Timeout? **[asked x2 in your bank]**

Element Interactions, Actions & JavaScriptExecutor (9)

160. When should you use sendKeys() vs sendKeys() from the Actions class? **[asked x2 in your bank]**
161. How do you handle checkboxes and radio buttons (e.g. click all checkboxes)? **[asked x2 in your bank]**
162. How do you validate infinite scroll and lazy-loaded content? **[asked x2 in your bank]**
163. How do you handle cookies? **[asked x2 in your bank]**
164. How do you verify tooltips? **[asked x2 in your bank]**
165. How do you capture network traffic, simulate network conditions and read browser console logs? **[asked x4 in your bank]**
166. How do you get text from a text box when getText() does not work?
167. How do you get dropdown values and print them in ascending order (TreeSet)? **[asked x2 in your bank]**
168. How do you take element-only and full-page screenshots? **[asked x2 in your bank]**

Windows, Frames, Alerts & Pop-ups (4)

169. If you do not accept an alert, what happens?

170. How do you open a new blank window/tab, close only the current tab or close all tabs? **[asked x3 in your bank]**
171. What is the difference between frames and iframes and how are they identified? **[asked x2 in your bank]**
172. How do you test scenarios with third-party iFrames?

Exceptions & Troubleshooting (1)

173. What if the execution aborts mid-suite due to an unhandled exception?

Flaky Tests, Retry & Debugging (1)

174. What is self-healing in automation and is it possible with Selenium?

File Upload/Download & Broken Links (1)

175. How do you count the links on a page (by tag) and handle hidden links? **[asked x2 in your bank]**

Framework Design & Architecture (4)

176. What are the SOLID principles and how do you apply them in automation? **[asked x2 in your bank]**
177. What is the difference between a framework and a library? **[asked x2 in your bank]**
178. How do you implement error handling and recovery in the framework? **[asked x2 in your bank]**
179. How do you implement custom assertions and validations?

TestNG (1)

180. What is the @Factory annotation? Factory vs DataProvider (with a real-time example)? **[asked x3 in your bank]**

Cucumber & BDD (4)

181. What are common challenges in writing Cucumber tests and how do you keep scenarios readable and maintainable? **[asked x2 in your bank]**
182. How do you handle dynamic locators in Cucumber steps?
183. Can you share an example of a complex scenario you wrote? How do you ensure collaboration between developers, testers and business in BDD? **[asked x2 in your bank]**
184. How do you skip scenarios in Cucumber? How do you integrate Cucumber in a Maven project? **[asked x3 in your bank]**

Scenario-Based & Real-World Automation (5)

185. You are asked to automate a legacy application. What is your approach? **[asked x2 in your bank]**
186. How would you design tests for a shopping cart and a multi-step form with validation? **[asked x2 in your bank]**
187. How do you validate an email sent after registration or an email verification link? **[asked x3 in your bank]**
188. How do you test responsive layouts and mobile web with Selenium? **[asked x4 in your bank]**
189. How do you measure page load time through automation? **[asked x2 in your bank]**

Automation Strategy, Metrics & Career (5)

190. What is the risk of over-automation? How do you avoid duplicate and redundant tests? **[asked x3 in your bank]**

191. Why avoid hardcoded values, and how do you ensure reusability in test methods? **[asked x2 in your bank]**
192. How should you handle test dependencies and execution order? Why should tests be atomic? **[asked x3 in your bank]**
193. How often should you refactor automation scripts?
194. How do you implement validation for negative test cases?

Section 4: Low Priority / Quick Revision (11 questions)

Niche or rarely asked at 4+ years. Skim them so you are never caught off guard.

Selenium & WebDriver Fundamentals (1)

195. Why do we use getAriaRole() and getAccessibleName()?

Element Interactions, Actions & JavaScriptExecutor (3)

196. How do you highlight an element before clicking (JavaScript)? **[asked x3 in your bank]**
197. How do you handle browser notifications?
198. How would you cover character keyboard operation from the context menu using a user-defined keyword? (legacy tool question)

TestNG (1)

199. What are custom annotations in TestNG, and what is the role of annotations in framework optimization? Can test behavior be changed at runtime? **[asked x3 in your bank]**

Cucumber & BDD (1)

200. What is the significance of the cucumber.properties or cucumber.yml file?

Scenario-Based & Real-World Automation (1)

201. How do you automate localization testing (different UI languages)?

Automation Strategy, Metrics & Career (4)

202. How do you conduct automation code reviews and walkthroughs, document the framework and version test cases? **[asked x3 in your bank]**
203. What is the role of the traceability matrix in QA?
204. What are your daily activities as an automation engineer? How do you stay current and balance manual and automation work? **[asked x3 in your bank]**
205. How do you test the stability, data reusability, performance and rollback of the automation framework? **[asked x4 in your bank]**
